PUAFER005

Operate as part of an emergency control organisation

PUAFER008

Confine small emergencies in a facility-

Nationally recognised training to keep your workplace safe and compliant.

Fire Warden + Fire Extinguisher Training Courses

This training provides learners with the skills and knowledge to operate as part of an emergency control organisation. It applies to employees within all industries. It places responsibility on individual employees who are delegated roles within the emergency control organisation and to participate in the preparation of workplace emergency procedures. This may including raising alarms to report potential workplace emergencies, evaluate the need to evacuate and prepare for an evacuation including evacuating people who may require assistance in accordance with workplace emergency procedures.

This unit has been developed to cover the broad range of emergencies and workplaces as considered in Australian Standard 3745-2010.

Also included in this training is the skills a knowledge to assess, and safely extinguish small fires within the workplace. Topics include fire safety awareness, fire fighting equipment and their applications.

Fire Warden + Fire Extinguisher Training course includes these 2 key unit of competency:

- **PUAFER005 Operate as part of an emergency control organisation**
- **PUAFER008 Confine small emergencies in a facility**

The practical component will give participants hands-on practical experience with evacuation exercises, using communication equipment (EWIS) and selection of firefighting equipment. They will also be able to demonstrate correct firefighting skills/tactics and follow safety procedures.

Duration & Delivery Options:

- Face-to-face: 5 hours
- Blended learning: Online theory + 2.5 hours face-to-face

There is no prerequisite for this course.

Fire warden + Fire Extinguisher Training Courses

REAL fire emergency scenarios conducted by REAL professional firefighters

Theory consists of;

- Emergency situations scenarios
- Roles and responsibilities of the emergency control organisation (ECO)
- Roles and responsibilities of the Chief warden
- How to raise the alarm
- Understanding evacuation diagrams and procedures
- Utilising emergency intercommunication systems
- Fire safety and evacuation procedures
- Dynamic risk assessments
- Liaising with emergency services
- Record keeping and debriefing
- Emergency planning committees
- Basic fire science
- Classes of fire
- Types of fire extinguishers and fire fighting equipment
- Firefighting skills
- Safety precautions

The practical component involves:

- Selection of the correct fire extinguisher
- The use of a Carbon Dioxide (CO2) fire extinguisher on a REAL fire
- The use of a fire blanket
- Participants will gain hands-on practical experience with fire-fighting equipment. They will also be instructed in correct firefighting tactics and safety procedures.

Successful completion of this training will be awarded the Statement of Attainment which will be emailed on completion of the training course.

Course consists of both theory and practical, including theory and practical assessments.

Course combo: With blended learning, you can include an additional course and complete on the same day - Save 20% of the total pricing when you combine courses!
